Ephemeral seed exchanges In addition to the main Bulb & Seed Exchange in summer, Jon Evans also arranges exchanges for “ephemeral” seeds, which ripen in autumn and must be sown as soon as possible after they ripen, and are therefore not suitable to be saved until the main exchange the following year.

November Bulb and Seed Exchange 2025 [View or download this announcement here] Once again, members have expressed interest in running an exchange for summer-growing bulbs and ephemeral (short-lived) seed. We are planning to run the exchange on the same timing as last year, as some of the seeds spoiled by being kept too long. Material should be sent out mid-November, so it can be planted and started into growth in a timely fashion.
